**CREATING  
INTERIORS**

HÖLLER. THE CREATIVE PARTNER  
FOR EXCLUSIVE INTERIORS. WE DEVELOP AND  
CREATE CUSTOMISED INTERIORS  
FOR YACHTS AND ARCHITECTURAL PROJECTS.

## THE BEST TEACHERS IN THE WORLD

If you live in the mountains, you know how to tackle challenges.

It was Le Corbusier who said the Dolomites in South Tyrol, our homeland and UNESCO World Heritage Site, are the most beautiful architectural construction in the world, formed by the coral reefs of a primordial seabed. This heritage has shaped us both as people and in our approach to our work: The Alpine connection with the earth bestows reliability and diligence, while an effortless Mediterranean ease assures flexibility and a flair for design.

Each and every day nature reveals her beauty to us, and teaches us to take responsibility for our surroundings. And we follow these teachings in our attentiveness to sustainability.

# INNOVATIVE APPROACH, FOR THREE GENERATIONS

An open mind, curiosity and courage are in the Höller family's DNA. In 1949, Josef Höller launched his master-carpentry business in South Tyrol, and from that moment onwards he followed the path less travelled to achieve his objectives – and not just when it came to delivering his creations to customers on the roof of a Fiat.

The carpentry business evolved to become a specialist in exclusive interior design. Whether innovative architectural projects, homes oozing with character or luxury yachts, Höller, now in the hands of Klaus Höller and his daughter Katrin, create unique

one-off custom pieces for customers the world over. Around 50 highly-qualified employees are an essential part of the family company, and some have been with Höller for decades. In 2015, Höller opened a further premises in Switzerland in order to guarantee international customers the very best of care. Production continues, as previously, in the workshops in Laives, South Tyrol.

70 years of experience have given us strong roots: That same spirit of experimentation and visionary outlook are now guiding the company towards the future.

ROOM FOR PERFECTION.  
ALPINE CRAFTSMANSHIP  
THROUGHOUT THE WORLD.

# FOR US, EVERY PROJECT IS SPECIAL

We advise architects and shipyards on the technical realisation of their projects and, on request, bring our own creative ideas to the table: A mutually enriching relationship that leads to innovative results.

Through structural and static calculations, our technicians create a secure foundation upon which we work and experiment until we find the optimal solution for the most complex of challenges. In order to ensure that we are able to satisfy the most exacting of demands, we develop tailor-made manufacturing and processing techniques, experiment with new materials and work with only the very best of suppliers and certified products.

With our technical expertise and experience we have firm control of every step in the process and, together with our partners, guarantee punctual, smooth completion of turnkey projects, all from one single source.

**WHEN CREATIVE CRAFTSMANSHIP MEETS WITH CUTTING-EDGE TECHNOLOGY, THE RESULTS ARE UNIQUE.**

During the implementation phase, we unite state-of-the-art technology with traditional artisan methods. Our master carpenters hone the wood into perfect shape, round or square, with skilled technique and creative sensitivity, and join together the finest of veneers in seamless perfection. From planning to installation, each single step is carried out with the utmost of precision and care. The result is custom-made interiors that are made to last, as unique as our customers.

We monitor the quality of our work in every detail, and keep our health and safety policy under constant review.

# WE BRING THE BEST TO THE SURFACE

As specialists in surface treatments, we bring a gleaming shine to our work with precision craftsmanship: an elaborate process, which calls for a sensitive touch and skilled technique in every layer.

## TRUE LUXURY IS IN THE DETAILS

We work together with shipyards and designers to design and produce tailor-made luxury yacht equipment for the owner and VIP area. Sophisticated technical touches guarantee the best use of space and outstanding comfort: We meet the challenges of the seas with top-quality materials, state-of-the-art technology and precision production. Compliance with legal standards and PYC safety standards are a given, every bit as much as our absolute discretion towards our clients.

## GIVING SHAPE TO INNOVATIVE ARCHITECTURE

Over 15 metres in height, 9 metre-long solid wood benches and 2000 m<sup>2</sup> of Canadian maple - and not a single right angle: Contemporary buildings need individual, custom solutions. We work together with architects to create sophisticated architectural projects all over the world.

## CUSTOMISED COMFORT

Private spaces are as diverse as their inhabitants. That's why we harmonise our interiors with the people who live there, down to the smallest detail. High-quality woods and selected materials create an atmosphere of intimacy and creative concepts guarantee sublime comfort, whether in downtown apartments or vast villas. From floor to furnishings to wall design, every detail is coordinated to perfection.

OUT-OF-THE-BOX THINKERS. INVENTORS. PIONEERS.  
VISIONARIES. PLANNERS. ADVENTURERS. LEADERS.  
TEAM PLAYERS. PERFECTIONISTS. COORDINATORS.  
PROJECT MANAGERS.
